Important Safety Information

Improper handling can cause serious damage to the EdgeStar wine and beverage cooler and/or injury to the user. This wine and beverage cooler is designed for domestic indoor use only. **Do not use the unit for industrial or commercial use.** Any other use may invalidate the warranty. Please review the ratings label located on the rear panel of the unit for electrical and other technical data related to this unit. The unit must be used in a properly grounded wall outlet.

Please read and follow the safety information listed below to reduce the risk of fire, electric shock or injury.

Electrical Safety

- Do not exceed the power outlet ratings.
- It is recommended that the wine and beverage cooler be connected on its own circuit.
- This unit must be installed in accordance with state and local electrical codes.
- A standard electrical supply (115 V, 60Hz), that is properly grounded in accordance with the National Electrical Code and local codes and ordinances is required.
- Use outlets that cannot be turned off by a switch or pull chain.
- Always turn the unit off and unplug it from the outlet when cleaning.
- Unplug the unit if it is not going to be used for an extended period of time.
- Do not operate the unit with a power plug missing the ground plug, a damaged cord or a loose socket.
- Be sure the wine and beverage cooler is properly grounded.
- Never plug or unplug the unit with wet hands.
- Do not bypass, cut or remove the grounding plug.
- Do not use extension cords or power strips with this unit. You may need to contact your electrician if it is necessary to use a longer cord or if you do not have a grounded outlet. Do not modify the power cord's length or share the outlet with other appliances.
- Do not start or stop the unit by switching the circuit's power on and off.
- If the power cord is damaged, it must be replaced by the manufacturer or a qualified technician.
- Never repair the unit while it is plugged in.
- Immediately unplug the unit if it makes strange sounds, emits smells or smoke comes out of it, and contact customer service.
- Do not remove any part of the casing unless instructed by an authorized technician.
- You should never attempt to repair the unit yourself.
- Contact customer service for service options if the unit needs service.

General Safety

- To prevent back and other types of injuries, use at least two people to move and install the unit.
- This appliance is not intended for use by persons, including children, with reduced physical, sensory or mental capabilities, unless they have been given supervision or instruction concerning the use of the appliance by the person(s) responsible for their safety.
- Install the wine and beverage cooler in a well-ventilated area where the ambient temperature is above 65°F and below 90°F.
- The temperature range for this cooler is optimized for wine and beverage storage. Perishable food items may require a different storage environment.
- Do not place hot or warm items into the cooler before they cool down to room temperature.
- This unit is designed to be installed indoors, and protected from rain, sleet, snow, and/or moisture.
- This unit is not intended to be used by children.
- Children should be supervised to ensure that they do not play with this product.
- Never allow children to crawl inside the unit. If disposing the unit, remove the door.
- Do not use this appliance near flammable gas or combustibles, such as gasoline, benzene, thinner, etc.
- Do not place the unit near heat sources such as ovens, grills, or direct sunlight.
- Only use in an upright position on a flat, level surface and provide proper ventilation.
- Do not pinch or kink the power supply line between the unit and cabinet.
- Do not leave any cleaning solutions in the unit
- Do not use solvent-based cleaning agents or abrasive solutions to clean the unit as they may damage the interior and exterior.
- Do not place any other appliances on top of the unit.
- Do not turn the unit upside down, on its side, or at an angle off level.
- Take care to keep the keys to the unit's lock away from children.
- Do not move the unit without emptying the contents and securing the door in a closed position.

First Time Operating Instructions

Before use, make sure all packaging labels and materials are all removed from the unit. Be sure to keep track of all included parts and pieces before discarding packaging materials. It is advised that you keep the original box and packaging materials in case you are ever to move or ship the appliance in the future.

Let the unit stand for at least 24 hours before you use it; this allows the cooling components time to settle from transit. The instruction manual should be read before use.

This owner's manual is provided for reference use only. Specifications may change without prior notice. Refer to the product label on the back of your wine and beverage cooler for the latest technical information.

Introduction

Thank you for purchasing this EdgeStar wine and beverage cooler. We are glad you chose us. We believe that your purchase of this product opens a relationship between you and EdgeStar. We will provide the customer support needed to nurture that relationship.

This manual contains important information regarding the proper installation, use and maintenance of your wine and beverage cooler. Following this manual will ensure that your product will work at its peak performance and efficiency.

Please save the original product packaging in case you need to safely transport your wine and beverage cooler.

For Your Records:

Please write down the model number and serial number below for future reference. Both numbers are located on the ratings label on the back of your unit and are needed to obtain warranty service. You may also want to staple your receipt to this manual as it is the proof of your purchase, and is also needed for service under your warranty.

Model Number: _____

Serial Number: _____

Date of Purchase: _____

To better serve you, please do the following before contacting customer service:

- If you received a damaged product, immediately contact the retailer or dealer that sold you the product.
- Read and follow this instruction manual carefully to help you install, use and maintain your wine and beverage cooler.
- Read the troubleshooting section of this manual as it will help you diagnose and solve common issues.
- Visit us on the web at **<http://www.edgestar.com>** to register your product, download product guides, additional troubleshooting resources and up-to-date information.
- If you need warranty service, our friendly customer service representatives are available via email at **service@edgestar.com** or by telephone at **1 (866) 319-5473**.

Parts Identification

Front View

Back View

Tip: Gather the model and serial number from the product label and write them down before installing the wine and beverage cooler.

Installing the Wine and Beverage Cooler

The wine and beverage cooler should be installed in accordance with local electrical code requirements. The wine and beverage cooler should also be placed in a location that is strong enough to support its total weight, keeping in mind that it will weigh substantially more when fully loaded than when empty.

Before you plug the wine and beverage cooler into a power supply, be sure to let it stand upright for at least 24 hours to allow the compressor's oils to settle.

Unpacking the Wine and Beverage Cooler

WARNING: Use two or more people to move and install the wine and beverage cooler. Failure to do so can result in back or other injury. Carefully remove the packaging materials. Remove any shipping tape and glue from your wine and beverage cooler before using. Do not use sharp instruments, rubbing alcohol, flammable fluids, or abrasive cleaners to remove tape or glue. These products can damage the surface of your wine and beverage cooler.

IMPORTANT: Do not remove any safety, warning, or product information labels from your wine and beverage cooler.

Types of Installation

This wine and beverage cooler has been designed for free standing or built-in installation. In every case, there must be adequate ventilation and access for service.

Free Standing installation:

A free standing installation will allow you to install the wine and beverage cooler in almost any location you desire. You must follow the stated instructions for electrical requirements and leveling the wine and beverage cooler.

Built-in installation:

A recessed installation will allow you to install the wine and beverage cooler under a counter or in a kitchen cabinet provided the required clearance space around the wine and beverage cooler is followed.

It is necessary to allow adequate ventilation space around the unit (make sure there is at least some ventilation room for the back of the unit). The following additional items must be observed.

1. Place the wine and beverage cooler in front of the installation location. Adjust the front leveling feet and place the unit flat on the floor or on a platform depending on your installation requirements.
2. If the electrical outlet for the wine and beverage cooler is behind the cabinet, plug in the wine and beverage cooler.
3. Push the wine and beverage cooler into position.

WARNING: Do NOT install the wine and beverage cooler behind a closed cabinet door.

Installation Clearance Requirements

When installing the wine and beverage cooler under a counter, follow the recommended spacing dimensions shown.

- To ensure proper service access and ventilation, allow at least 2-3" of clearance at the back of the unit. The installation should allow the unit to be pulled forward for servicing, if necessary.

Important Notes:

- Choose a location that has ambient temperatures above 65°F and below 90°F. Operation outside of these temperatures may result in lowered efficiency or cause other adverse effects.
- This unit **MUST** be installed in an area protected from the elements, e.g., wind, rain, water spray or drips.
- The wine and beverage cooler should not be located next to ovens, grills or other high heat sources.
- Do not kink or pinch the power supply cord between the cooler and wall or cabinet.

Side View

- The wine and beverage cooler should be installed on a firm and level surface that will be able to support the entire weight of a fully loaded unit. It is important for the wine and beverage cooler to be level in order to work properly. If needed, you can adjust the height of the wine and beverage cooler by rotating the feet. See the "Leveling the Wine and beverage cooler" section.
- A standard electrical supply (115 VAC only, 60 Hz), properly grounded in accordance with National Electrical Code and local codes and ordinances is required.

Electrical Requirements

ELECTRIC SHOCK HAZARD!

- **Plug into a grounded 3-prong outlet.**
- **Never remove the grounding prong from the plug.**
- **Never use an adapter to bypass the grounding prong.**
- **DO NOT use an extension cord.**
- **Failure to follow these instructions can result in fire, electrical shock, or death.**

Before you move your wine and beverage cooler into its final location, it is important to make sure you have the proper electrical connection: A standard electrical supply (115 V, 60Hz), properly grounded in accordance with the National Electrical Code and local codes and ordinances, is required.

It is recommended that a separate circuit, serving only your wine and beverage cooler, be provided. Use receptacles that cannot be turned off by a switch or pull chain.

The fuse (or circuit breaker) size should be 3 Amps.

Recommended grounding method

For your personal safety, this appliance must be grounded. It is equipped with a power supply cord having a 3-prong grounding plug. To minimize possible shock hazard, the cord must be plugged into a mating 3-pronged wall socket, and grounded in accordance with the National Electrical Code and local codes and ordinances. If a mating wall socket is not available, it is the personal responsibility of the customer to have a properly grounded, 3-prong wall receptacle installed by a qualified electrician.

Leveling the Wine and Beverage Cooler

It is important for the wine and beverage cooler to be leveled in order to work properly. It can be raised or lowered by rotating the plastic sheaths around each of the front two feet on the bottom of the machine. If you find that the surface is not level, rotate the feet until the wine and beverage cooler becomes level. You may need to make several adjustments to level it. We recommend using a carpenter's level to check the machine.

1. Place a carpenter's level on top of the product to see if the wine and beverage cooler is level from front to back and side to side.

2. Adjust the height of the feet as follows:

Turn the leveling feet clockwise to lower that side of the cooler.

Turn the leveling feet counterclockwise to raise that side of the wine and beverage cooler.

IMPORTANT: Once you are ready to install it in a cabinet or directly on the floor, you must adjust the feet to level the wine and beverage cooler.

Installing and Removing the Shelves

To prevent damaging the door gasket, make sure to open the door all the way before pulling the shelves out of their track.

To install the shelves:

1. Open the door completely.
2. Slide the shelf on the shelf track and slowly push back until it stops.
3. Push down on the front of the shelf to allow the back of the shelf to lift over the plastic post. (Imagine a seesaw movement.) Continue to push the shelf back until both notches pass through the plastic posts on each side of the shelf track.
4. Continue to push the shelf back.

To remove the shelves:

1. Open the door completely.
2. If necessary, make sure you remove all the contents sitting on the shelf.
3. Pull the shelf forward until the notch aligns with the plastic post on each side of the shelf track.

4. Lift the shelf until both notches pass through the posts.
5. Continue to pull the shelf forward until it is completely removed from the inner compartment.

Reversing the Door Swing

Follow the instructions below to reverse the door swing.

IMPORTANT: Before you begin, unplug the wine and beverage cooler. It is recommended that two people perform the steps below.

Figure 1

Figure 2

Note: Save all unused parts in case you need to reverse the door back to a right swing in the future.

To reverse the door from right swing to left swing:

1. Remove the two screws from the front vent with a Phillips screwdriver. See Figure 1. Then, remove the front vent cover. This will expose the bottom hinge.
2. Use your thumb to press down on the stainless steel screw in the middle of the top of the door, and turn it counterclockwise to unscrew it. See Figure 2. Save this screw.
3. Remove the cover from the upper right hinge to expose the three upper hinge screws. While holding the door with your left hand, use a Phillips screwdriver to remove the three screws.
Important: Be sure to safely set aside the hinge, hinge cover and screws as they will be used later.
4. Firmly grasp the door with both hands and lift it out of the lower hinge. Place the door on a padded surface to prevent damage or scratches.
5. There are two bushings in the upper hinge hole of the door, one large and one small, and only one large bushing in the lower hinge hole of the door. Remove the three bushings and reinsert them so that the one large and one small bushing from the top are now located on the original bottom of the door. Insert the large bushing from the lower hinge hole and place it in the original upper hinge hole.
6. Unscrew the lower hinge screws of the unit (located above the front right leveling leg) with a 10mm socket wrench, and remove the hinge and rubber washer. Save the washer for the next step.
7. Install the spare lower hinge that was included in your manual bag to the cabinet above the front left leveling leg with a socket wrench. Add the rubber washer saved from the previous step.
8. Use your thumb to press down on one of the three black capped screws on the top left corner of the cabinet. Turn it counterclockwise to unscrew it and remove it. Repeat for the other two black capped screws and set them safely aside.
9. Pick up the door and rotate it 180 degrees so that the handle is on your right side when facing the front of the door. Place the bottom left bushing on the newly installed bottom left hinge.
10. Align the upper hinge with the three exposed holes on the upper left cabinet and, using a Phillips head screwdriver, use the screws from step 3 to install the hinge.

11. Place the hinge cover over the upper left hinge.
12. Install the three black capped screws from step 8 into the three exposed holes located on the top right of the cabinet.
13. Reinstall the front vent cover.
14. Hand tighten the stainless steel screw from step 2 to cover the hole in the middle of the top of the door.

OPERATION

Using the Temperature Control Panel

Note: The scale of the control panel in this image has been compressed to fit this manual.

Each zone is independently controlled by the touchpad controls that are located on the center divider (pictured above). The temperature display can be in Fahrenheit or Celsius. Each zone of this wine and beverage cooler has a temperature range from 34°F to 65°F.

To toggle between Fahrenheit and Celsius, press the  button.

This wine cooler has two displays, an Upper Zone display that shows the temperature in the top section, and a Lower Zone display that shows the temperature in the bottom section.

Note: Whether your wine and beverage cooler can reach the actual set temperature depends on the ambient environmental conditions.

Press the  button on the control panel to adjust the temperature higher and the  button to lower the set temperature. These buttons will scroll the temperature by one degree increments. Once you see the desired temperature, stop pressing the button. The wine and beverage cooler will then show the actual temperature rather than the set temperature.

By default, all controls for this unit are locked after 12 seconds of user inactivity. To unlock the controls, press and hold both temperature control

buttons for the upper zone   at the same time for at least three (3) seconds.

Note: Allow at least 24 hours before storing your wines and beverages to allow the temperature to acclimate.

Caution: If you powered off the unit, please wait at least 5 minutes before powering it back on.

Each zone also features a blue LED light. Press the  button to turn each inner light on, and press it again to turn the lights off.

Press and hold the power button  for approximately three (3) seconds to turn the unit's power on or off.

Normal Sounds

Your new wine and beverage cooler may make sounds that are not familiar to you. Most of the new sounds are normal. Hard surfaces like the floor and walls can make the sounds seem louder than they actually are. The following describes the kinds of sounds that might be new to you and what may be making them.

- Rattling noises may come from the flow of the refrigerant. Items stored on top of the wine and beverage cooler can also make noises.
- The high efficiency compressor may make a pulsating or high-pitched sound.
- As each cycle ends, you may hear a gurgling sound due to the refrigerant flowing in your wine and beverage cooler.
- You may hear air being forced over the condenser by the condenser fan.

Defrosting

Note that under most refrigerating settings, the unit will automatically defrost under most ambient conditions. However, on colder settings, some frost may build up. Additionally, the more humid the ambient conditions, the more frost may build up. Keep the door closed as much as possible and avoid opening the door unnecessarily to minimize frost build-up.

If frost is preventing the door from closing properly, you may need to power the unit off until the frost melts. Use a soft absorbent towel to dry the unit. Some defrost water will drain into the drip dish on the compressor and the water will be evaporated by the compressor.

WARNING: Never attempt to remove frost with a sharp object!

IMPORTANT:

- Do not touch the power plug when your hands are wet.
- Never unplug the unit by pulling on the plug.

Preparing the Wine and Beverage Cooler for Storage

If the wine and beverage cooler will not be used for a long time, or is to be moved to another place, it will be necessary to defrost the unit and dry the interior.

1. Disconnect the cooler from the power supply by removing the power plug from the wall socket.
2. Leave the door open to allow for air circulation and to prevent mold, mildew and unpleasant smells.

CAUTION: Store the unit out of the reach of children. If you have children, you may want to take additional precautions such as removing the door to prevent a child from being trapped inside the cooler!

CLEANING AND MAINTENANCE

Periodic cleaning and proper maintenance will ensure efficiency, top performance and long life.

Exterior Cleaning

The door and cabinet may be cleaned with a mild detergent and lukewarm water solution such as 2 tablespoons of baking soda to 1 quart of water.

Do not use solvent based or abrasive cleaners. Use a soft sponge and rinse with clean water. Wipe with a soft clean towel to prevent water spotting. If the door panel is stainless steel, it can discolor when exposed to chlorine gas and moisture. Clean stainless steel with a cloth dampened with a mild detergent and warm water solution. Never use an abrasive or caustic cleaning agent.

Interior Cleaning

The wine and beverage cooler's interior should be cleaned occasionally.

1. Disconnect power to the unit.
2. Open the door and remove the contents and shelves.
3. Wait until the unit defrosts.
4. With a clean cloth, wipe down the interior of the unit.
5. Reinsert the shelves and beverages.
6. Reconnect power to the unit.

TROUBLESHOOTING

Before Calling for Help

If the unit appears to be malfunctioning, read through the OPERATION section of this manual first. If the problem persists, check the Troubleshooting Guide below and on the following page. The problem could be something that can easily be solved or explained.

Symptoms	Possible causes	Solutions
The wine and beverage cooler turns on and off frequently.	The room temperature is higher than the recommended ambient environment.	Run the cooler at the appropriate ambient temperature.
	The door is being opened often.	Minimize the number of times the door is opened.
	The door is not completely closed.	Make sure the door is completely closed.
	The door gasket is not sealing properly.	Make sure the door gasket is properly sealing.
	The cooler does not have the suggested ventilation.	Read and follow the "Installation Clearance Requirements" section.

Troubleshooting continued

Issue	Possible cause	Solution
The wine and beverage cooler does not turn on.	There is a power failure.	Ensure the cooler is plugged in and the power outlet has power.
	The cooler is not plugged in.	Plug the unit in to a power outlet that has sufficient amperage.
	A house fuse has blown or the circuit breaker is tripped.	Replace the broken fuse in your fuse box or reset the breaker.
The wine and beverage cooler will not reach the desired temperature	The cooler is placed too close to a heat source.	Keep the cooler away from direct sun light or other heat sources.
	The cooler does not have sufficient ventilation.	Read and follow the “Installation Clearance Requirements” section.
	The door is opened too frequently or for a long period of time.	Close the door tightly and do not open the door too frequently or for a long period of time.
The wine and beverage cooler is making strange noises	Certain sounds are normal.	Read the “Normal Sounds” section.
	The unit is not level or is touching another appliance.	Check to make sure that the cooler is level, and that it is not in contact with another appliance or furniture.
The body of the wine and beverage cooler is electrified.	The unit is not grounded properly.	Contact your local electrician to test your electrical grounding system.
Frost is forming in the wine cooler.	The environment is humid.	Though the unit uses an “auto-defrost” system, under certain conditions, manual defrosting may be required. If frost builds up, you can try running the cooler on a warmer temperature setting, minimizing the number of times you open the door, or unplugging the unit to allow the frost to melt.
	The ambient temperature is too low.	
	The door is being opened too frequently.	
The door will not shut properly.	Your cooler is not level.	Make sure the cooler is on a level surface.
	The door gasket is dirty.	Clean the door gasket.
	The door gasket is not installed correctly.	Make sure the door gasket is properly installed.
	The shelves are incorrectly installed.	Correctly install the shelves.

Specifications

Description of product	Built-in Wine and Beverage Cooler
Model	CWB7016DZ
Voltage/Frequency	AC 115V~60Hz
Amperage	1.75A
Input Power	110W
Color	Black Cabinet; Stainless Steel Door
Storage Capacity	16 wine bottles*, 70 standard 12oz. cans
Refrigerant	R134a, 3.3 oz.
Temperature Range	34 - 65°F
Dimensions (Height x Width x Depth)	34" x 23 1/2" x 24 1/2"***
Weight	103 pounds

Note: Technical data and performance information is provided for reference only.

Specifications are subject to change. Check the rating label on the wine and beverage cooler for the most accurate information.

***Note on wine storage capacity:**

The wine and beverage cooler will store 16 standard 750 ml. wine bottles.

***Depth includes the handle.

This product is warranted by EdgeStar and is subject to any conditions set forth as follows:

WHAT IS COVERED:

For a period of ONE (1) YEAR from the date of original retail purchase, EdgeStar will repair or replace any part free of charge including labor that fails due to a defect in materials or workmanship. Labor will be performed free of charge at an authorized EdgeStar repair facility and EdgeStar will supply new, rebuilt, or refurbished parts free of charge. EdgeStar may request a defective part be returned in exchange for the replacement part. All replacement parts or products will be new, remanufactured, or refurbished. All products and parts replaced by EdgeStar under warranty service become the property of EdgeStar. After the 12 month period, EdgeStar will no longer be responsible for labor charges incurred or replacement parts. All defective products and parts covered by this warranty will be repaired or replaced on a mail-in basis to an EdgeStar authorized repair facility.

This warranty applies to the original purchaser only, and only covers defects in workmanship experienced during operation of the product under normal service, maintenance, and usage conditions. This warranty applies to the purchase and use of this product in residential settings within the United States of America.

Exceptions: Commercial or Rental Use Warranty

90 days labor and parts from date of original purchase. No other warranty applies.

WHAT IS NOT COVERED- The following limitations apply to the coverage of this warranty. This warranty does not cover:

- Labor charges for installation, setup or training to use the product.
- Shipping damage, and any damage caused by improper packaging for shipment to an authorized service center, and any damaged caused by improper voltage or any other misuse, including abnormal service, handling, or usage.
- Cosmetic damage such as scratches and dents.
- Normal wear and tear on parts or replacement of parts designed to be replaced, e.g. filters, cartridges, batteries.
- Service trips to deliver, pick-up, or repair, install the product, or to instruct in proper usage of the product.
- Damages or operating problems resulting from misuse, abuse, operation outside environmental specifications, uses contrary to instructions provided in the owner's manual, accidents, acts of God, vermin, fire, flood, improper installation, unauthorized service, maintenance negligence, unauthorized installation or modification, or commercial use.
- Labor, service transportation, and shipping charges for the removal and replacement of defective parts, beyond the initial 12 month period.
- Products that have been modified to perform outside of specifications without the prior written permission of EdgeStar.
- Products lost in shipment, or theft.
- Products sold AS IS or from an unauthorized reseller.
- Products that have had their serial numbers removed, defaced, or with serial numbers that have been invalidated.
- Damage from other than normal household use.
- Replacement or repair of household fuses, circuit breakers, wiring or plumbing.
- Damage to personal property from use of product.
- Damage from service other than from an authorized EdgeStar repair facility.
- Hoses, knobs, lint trays and all attachments, accessories and disposable parts.
- Any service charges not specifically identified as normal such as normal service area or hours.
- Any special or consequential damages arising out of the use of the product.

OBTAINING WARRANTY SERVICE: If you believe your product is defective, contact EdgeStar Customer Support for troubleshooting assistance and warranty service at www.edgestar.com or call 1-866-319-5473. Before contacting Customer Support you are required to have your model number, serial number and proof of purchase available upon request. Once an EdgeStar authorized representative has confirmed that your product is defective and eligible for warranty service, the product must be returned to an EdgeStar authorized repair facility. EdgeStar is not responsible for damage resulting from shipper mishandling or improper packaging. Do not return a defective product to the place of purchase. Products received without a return authorization number will be refused.

THIS WARRANTY IS IN LIEU OF ANY OTHER WARRANTY, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. TO THE EXTENT ANY IMPLIED WARRANTY IS REQUIRED BY LAW, IT IS LIMITED IN DURATION TO THE EXPRESS WARRANTY PERIOD ABOVE. NEITHER THE MANUFACTURER NOR ITS DISTRIBUTORS SHALL BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL, OR PUNITIVE DAMAGES OF ANY NATURE, INCLUDING WITHOUT LIMITATION, LOST REVENUES OR PROFITS, OR ANY OTHER DAMAGE WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE. SOME STATES DO NOT ALLOW THE EXCLUSION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE EXCLUSION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE.
